

PMB Conditions

HIV-infection
Imminent death regardless of diagnosis
Low birth weight (under 1000g) with respiratory difficulties
Low birth weight (under 2500 grams & > 1000g) with respiratory difficulties
Respiratory failure, regardless of cause
Abscess of bursa or tendon
Abscess of intestine
Abscess of prostate
Abscesses of Bartholin's gland and vulva
Abuse or dependence on Psychoactive substance, including alcohol
Acquired haemolytic anaemias
Acquired hypertrophic pyloric stenosis and other disorders of the stomach and duodenum
Acute and chronic mastoiditis
Acute and chronic pyelonephritis; renal and perinephric abscess
Acute and subacute ischemic heart disease, including myocardial infarction and unstable angina
Acute asthmatic attack; pneumonia due to respiratory syncytial virus in persons under age 3
Acute delusional mood, anxiety, personality, perception disorders and organic mental disorder caused by drugs
Acute diverticulitis of colon
Acute generalised paralysis, including polio and Guillain-Barre
Acute glomerulonephritis and nephritic syndrome
Acute leukemias, lymphomas
Acute lymphadenitis
Acute necrosis of liver
Acute orbital cellulitis
Acute osteomyelitis
Acute otitis media
Acute pancreatitis
Acute pelvic inflammatory disease
Acute pulmonary heart disease and pulmonary emboli
Acute rheumatic fever
Acute stress disorder accompanied by recent significant trauma, including physical or sexual abuse
Acute thyroiditis
Acute upper airway obstruction, including croup, epiglottitis and acute laryngotracheitis
Acute vascular insufficiency of intestine
Adult respiratory distress syndrome; inhalation and aspiration pneumonias
Alcohol withdrawal delirium; alcohol intoxication delirium
Amoebiasis; typhoid
Anaerobic infections – life threatening
Anal and rectal polyp
Anal Fissure; Anal fistula
Anaphylactic shock
Aneurysm of major artery of chest, abdomen, neck, - Unruptured or ruptured NOS
Angle-closure glaucoma
Anorexia Nervosa and Bulimia Nervosa

Aplastic anemia; agranulocytosis; other life-threatening hereditary immune deficiencies
Appendicitis
Arterial embolism/thrombosis: abdominal aorta, thoracic aorta
Atelectasis (collapse of lung)
Attempted suicide, irrespective of cause
Bacterial, viral, fungal pneumonia
Basal ganglia, extra-pyramidal disorders; other dystonias NOS
Bell's palsy; exposure keratoconjunctivitis
Benign and malignant brain tumours, treatable
Benign and malignant tumours of pituitary gland with/without hypersecretion syndromes
Benign neoplasm of islets of Langerhans
Benign neoplasm of respiratory and intrathoracic organs
Birth trauma for baby
Botulism
Brief reactive psychosis
Budd-Chiari syndrome, and other venous embolism and thrombosis
Burns, greater than 10% of body surface, or more than 5% involving head, neck, hands, perineum
Calculus of bile duct with cholecystitis
Cancer of bones - treatable
Cancer of breast - treatable
Cancer of Cervix - treatable
Cancer of endocrine system, excluding thyroid - treatable
Cancer of liver, biliary system and pancreas - treatable
Cancer of lung, bronchus, pleura, trachea, mediastinum & other respiratory organs - treatable
Cancer of oral cavity, pharynx, nose, ear, and larynx - treatable
Cancer of ovary - treatable
Cancer of penis and other male genital organ - treatable
Cancer of prostate gland - treatable
Cancer of retroperitoneum, peritoneum, omentum & mesentery - treatable
Cancer of skin, excluding malignant melanoma - treatable
Cancer of soft tissue, including sarcomas and malignancies of the adnexa - treatable
Cancer of testis - treatable
Cancer of the eye and orbit - treatable
Cancer of the gastro-intestinal tract, including oesophagus, stomach, bowel, rectum, anus - treatable
Cancer of thyroid - treatable; carcinoid syndrome
Cancer of urinary system including kidney and bladder - treatable
Cancer of uterus - treatable
Cancer of vagina, vulva and other female genital organs NOS - treatable
Cancrum oris
Cardiac failure: acute or recent deterioration of chronic cardiac failure
Cataract; aphakia
Cellulitis and abscesses with risk of organ or limb damage or septicemia if untreated; necrotizing fasciitis
Cervical and breast cancer screening
Choanal atresia
Cholera; rat-bite fever
Cholesteatoma
Chronic Granulomatous disease
Chronic osteomyelitis
Chronic upper airway obstruction, resulting in cor pulmonale
Cleft palate and/or cleft lip without airway obstruction
Closed fractures/ dislocations of limb bones / epiphyses – excluding fingers and toes

Coagulation defects
Complete, corrected and other transposition of great vessels
Compound/ depressed fractures of skull
Congenital abnormalities of the female genitalia
Congenital anomalies of upper alimentary tract – excluding tongue
Congenital anomalies of urinary system - symptomatic and life-threatening
Congenital dislocation of hip; coxa vara and valga; congenital clubfoot
Congenital hypothyroidism
Congenital systemic infections affecting the newborn
Corneal ulcer; Superficial injury of eye and adnexa
Coronary artery anomaly
Crush injuries of trunk, upper limbs, lower limbs, including blood vessels
Cyst and pseudocyst of pancreas
Cysticercosis; other systemic cestode infection
Deep open wound of neck, including larynx; fracture of larynx or trachea, open
Deep-seated (excluding nail infections), disseminated and systemic fungal infections
Delirium: Amphetamine, Cocaine, or other psychoactive substance
Difficulty in breathing, eating, swallowing, bowel, or bladder control due to non-progressive neurological (including spinal) condition or injury
Diseases and disorders of aortic valve NOS
Diseases of endocardium; endocarditis
Diseases of mitral valve
Dislocations / fractures of vertebral column without spinal cord injury
Disorder of adrenal secretion NOS
Disorders of arteries: visceral
Disorders of bile duct
Disorders of parathyroid gland; benign neoplasm of parathyroid gland
Disruptions of the achilles / quadriceps tendons
Dissecting or ruptured aortic aneurysm
Disseminated bullous skin disease, including pemphigus, pemphigoid, epidermolysis bullosa, epidermolytic hyperkeratosis
Dysplasia of cervix and cervical carcinoma-in-situ; cervical condylomata
Ectopic pregnancy
Empyema and abscess of lung
Encephalocele; congenital hydrocephalus
End stage renal disease regardless of cause
Epilepsy (status epilepticus, initial diagnosis, candidate for neurosurgery)
Epistaxis – not responsive to anterior packing
Erysipelas
Fistula involving female genital tract
Foreign body in ear and nose
Foreign body in pharynx, larynx, trachea, bronchus & esophagus
Fracture of face bones, orbit, jaw; injury to optic and other cranial nerves
Fracture of hip
Frank haemoptysis
Gallstone with cholecystitis and/or jaundice
Gangrene; severe atherosclerosis of arteries of extremities; diabetes mellitus with peripheral circulatory disease
Gastric or intestinal ulcers with hemorrhage or perforation
Gastroenteritis and colitis with life-threatening haemorrhage or dehydration, regardless of cause
Giant cell arteritis, Kawasaki disease, hypersensitivity angiitis
Glaucoma associated with disorders of the lens
Haematological disorders of the newborn
Hepatorenal syndrome

Hereditary angioedema; angioneurotic oedema
Hereditary haemolytic anaemias (e.g. sickle cell); dyserythropoietic anemia (congenital)
Hereditary hemorrhagic telangiectasia
Hernia with obstruction and/or gangrene; uncomplicated hernias under age 18
Herpes zoster & herpes simplex with ophthalmic complications
Herpetic encephalitis; Reye's syndrome
Hydatidiform mole; choriocarcinoma
Hyper and hypothyroidism with life-threatening complications or requiring surgery
Hyperplasia of the prostate, with acute urinary retention or obstructive renal failure
Hypertension – acute life-threatening complications and malignant hypertension; renal artery stenosis and other curable hypertension
Hyphaema
Hypoglycemic coma; hyperglycemia; diabetic ketoacidosis
Hypoplasia and dysplasia of lung
Immune compromise NOS and associated life-threatening infections NOS
Infertility (Explanatory Note 9 of Annexure A of Regulations)
Inflammation of lacrimal passages
Injury to internal organs
Injury to major blood vessels - trunk, head and neck, and upper limbs
Injury to major blood vessels of extremities
Intestinal obstruction without mention of hernia; symptomatic foreign body in stomach, intestines, colon & rectum
Intraspinal and Intracranial abscess
Iron deficiency; vitamin and other nutritional deficiencies – life-threatening
Leprosy and other systemic mycobacterial infections, Excluding tuberculosis
Leptospirosis; spirochaetal infections NOS
Lethal midline granuloma
Leukoplakia of oral mucosa, including tongue
Life-threatening anaemia NOS
Life-threatening cardiac arrhythmias
Life-threatening complications of elective cardiac and major vascular procedures
Life-threatening conditions due to exposure to the elements, including hypo and hyperthermia; lightning strikes
Life-threatening congenital abnormalities of carbohydrate, lipid, protein and amino acid metabolism
Life-threatening diseases of pharynx NOS, including retropharyngeal abscess
Life-threatening disorders of fluid and electrolyte balance, NOS
Life-threatening rickettsial and other arthropod-borne diseases
Liver abscess; pancreatic abscess
Liver failure; hepatic vascular obstruction; inborn errors of liver metabolism; biliary atresia
Major affective disorders, including unipolar and bipolar depression
Malaria; trypanosomiasis; other life-threatening parasitic disease
Malignant melanoma of skin - treatable
Meningitis – acute and subacute
Menopausal management, anomalies of ovaries, primary and secondary amenorrhoea, female sex hormones abnormalities NOS, including hirsutism
Metastatic infections; septicaemia
Multiple myeloma and chronic leukaemias
Multiple valvular disease
Myasthenia gravis; muscular dystrophy; neuro-myopathies NOS
Myocarditis; cardiomyopathy; transposition of great vessels; hypoplastic left heart syndrome
Necrotizing enterocolitis in newborn
Neonatal and infant GIT abnormalities and disorders, including malrotation and atresia
Neonatal endocrine, metabolic and toxin-induced conditions
Neurological abnormalities in the newborn
Non-inflammatory disorders and benign neoplasms of ovary, fallopian tubes and uterus

Non-superficial open wounds – non life-threatening
Obstruction of the urogenital tract, regardless of cause
Oesophageal stricture
Oesophageal varices
Open fracture / dislocation of bones and joints
Open fracture of ribs and sternum; multiple rib fractures; flail chest
Open wound of ear-drum
Open wound of eyeball and other eye structures
Other aneurysm of artery – peripheral
Other correctable congenital cardiac conditions
Paralytic ileus
Patent ductus arteriosus; aortic pulmonary fistula - persistent
Pericarditis
Peripheral nerve injury with open wound
Peritoneal adhesion
Peritonitis, regardless of cause
Peritonsillar abscess
Phlebitis & thrombophlebitis, deep
Pneumothorax and haemothorax
Poisoning by ingestion, injection, and non-medicinal agents
Portal vein thrombosis
Pregnancy
Primary and open angle glaucoma with failed medical management
Purulent endophthalmitis
Pyoderma; body, deep-seated fungal infections
Pyogenic arthritis
Rectal prolapse
Regional enteritis; idiopathic proctocolitis – acute exacerbations and complications only
Respiratory conditions of newborn
Retained intraocular foreign body
Retinal detachment, tear and other retinal disorders
Retinal vascular occlusion; central retinal vein occlusion
Reversible CNS abnormalities due to other systemic disease
Rheumatic pericarditis; rheumatic myocarditis
Rupture of intra-abdominal organ
Rupture of papillary muscle
Schizophrenic and paranoid delusional disorders
Severe / moderate head injury: hematoma / oedema with loss of consciousness
Sexual abuse, including rape
Sexually transmitted diseases with systemic involvement not elsewhere specified
Shock / hypotension – life-threatening
Sialoadenitis; abscess / fistula of salivary glands
Spina Bifida
Spinal cord compression, ischaemia or degenerative disease NOS
Spontaneous abortion
Stomatitis, cellulites and abscess of oral soft tissue; Vincent's angina
Stroke – due to hemorrhage, or ischaemia
Subarachnoid and intracranial hemorrhage / hematoma; compression of brain
Sympathetic uveitis and degenerative disorders and conditions of globe; sight threatening thyroid optopathy
Syphilis - congenital, secondary and tertiary
Tetanus

Tetanus; anthrax; Whipple's disease
Tetralogy of Fallot (TOF)
Thalassemia and other haemoglobinopathies – treatable
Thrombosed and complicated haemorrhoids
Torsion of ovary
Torsion of testis
Toxic effect of gasses, fumes, and vapors
Toxic epidermal necrolysis and staphylococcal scalded skin syndrome; Stevens-Johnson syndrome
Transient cerebral ischaemia; life-threatening cerebrovascular conditions NOS
Trauma to the urinary system including ruptured bladder
Traumatic amputation of limbs, hands, feet, and digits
Treatable dementia
Tuberculosis
Tumour of internal organ (excludes skin): unknown whether benign or malignant
Ureteral fistula (intestinal)
Uterine prolapse; cystocele
Ventricular septal defect - persistent
Vertebral dislocations/ fractures, open or closed with injury to spinal cord
Vesicoureteral reflux
Viral meningitis, encephalitis, myelitis and encephalomyelitis
Voluntary termination of pregnancy
Whooping cough, diphtheria
